**LED Pendant light
LED Hall lighting**

DeltaLUXX - General

- ✓ Made in Germany
- ✓ For applications with high light points
- ✓ Sleek, modern industrial design
- ✓ Optional with optics for a wide range of applications
- ✓ Approved for fire endangered premises (D-Label)

The new hall deflector from GIFAS impresses with design and flexibility. The efficient thermal management of this hall light, which ensures a permanently adequate cooling even in dust and dirt-contaminated areas, supports the current and efficient LED technology with a service life of at least 80.000 hours. The DeltaLUXX can be integrated into intelligent lighting systems by means of optional DALI and 1-10V dimming interfaces.

On the basis of high-performance LEDs, the DeltaLUXX demonstrates its enormous luminaire efficiency, particularly in areas with high luminous intensity that are difficult to illuminate. With an external diameter of 450 millimeters, 180 high-end LEDs and high-quality individual optics with various different radiation characteristics, it is possible to be used in halls up to 25 meters high.

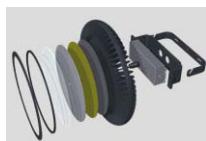

With its aluminum die-cast housing, a special PTFE non-stick coating for minimized dust and dirt adhesion, a pressure compensation diaphragm and the use of robust polycarbonate discs with increased splinter protection or toughened safety glass, the DeltaLUXX ensures reliable operation in ambient temperatures of up to 60 ° Celsius.

The design is convincing with modern industrial design and slim shapes.

DeltaLUXX - Construction / Features

- 1 Die-cast aluminium frame
- 2 U-profile silicon seal
- 3 Front panel (PC or toughened glass)
- 4 Optic
- 5 LED board
- 6 Heat conducting film
- 7 Die-cast aluminium housing
- 8 Cable gland with pressure compensation function
- 9 Power supply
- 10 Power supply bracket
- 11 Mounting bracket

GIFAS Approach

The basis of this development is based on the necessity of producing a high bay light that earns the **MADE IN GERMANY** quality seal in terms of performance and quality. The DeltaLUXX has succeeded in developing a competitive LED high bay light that meets the highest demands and is also used safely in demanding industries.

Modern

For the DeltaLUXX, only **high-end SMD** LEDs from well-known manufacturers are used, which are optimally matched to the parameters of light quality, service life, light color and efficiency. High-quality individual optics are installed for efficient

light distribution.

Robust

Industrial lights often show the problem of surface contamination and the associated cooling performance reduction. The **PTFE surface coating (ugs Teflon®)** of the DeltaLUXX has a very low coefficient of friction. Dust and dirt literally „pearl“ away from the luminaire. Even aggressive acids cannot attack the PTFE coating. The required thermal conductivity is due to the four times thinner PTFE coating, compared to the powder coating, given permanently.

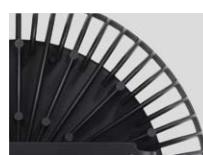

Future-proof

The DeltaLUXX impresses with its **enormous system efficiency and high quality of light**. With optional DALI and 1-10V dimming interfaces, the DeltaLUXX can be integrated into intelligent lighting systems. Use in sensor-controlled systems (light or presence detector) and opens up further energy-saving potential.

Highest quality

The components are selected to the highest quality standards: high-alloyed, corrosion-resistant aluminum housing, LEDs, mounting material made of stainless steel (V4A) and electronics from well-known manufacturers.

Individual test of each luminaire according to DIN EN 60598-1, certified according to ENEC.

Long life

Efficient cooling is essential to the life of the LEDs and ultimately affects the whole lighting system. In order to sustainably achieve this for the DeltaLUXX, high-quality technical components with a sophisticated design have been combined. The outer open ring ensures even with a high degree of contamination for the dissipation of heat generated. The design in conjunction with a very thin coating, heat-conducting foil for optimum connection of the contact surfaces, results in a **operating temperature range of up to 60 ° Celsius and a service life of at least 80,000 hours**.

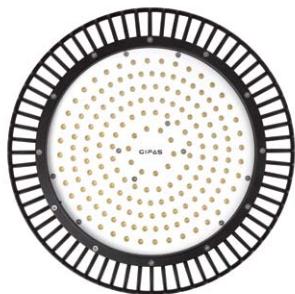

DeltaLUXX

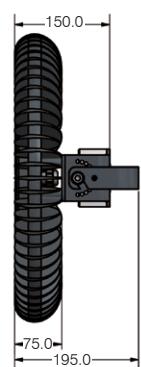

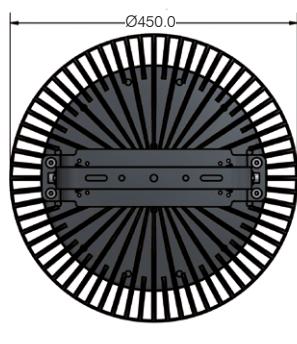

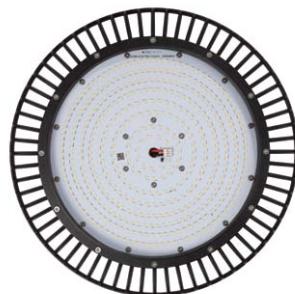

Product features

- Robust housing made of corrosion-resistant die-cast aluminium
- Dirt-resistant PTFE surface coating, approved for the food industry
- 3mm impact resistant plastic cover (PC) or
3mm toughened safety glass (ESG)
- Custom-made U-profile seal surrounding all sides
- Custom-made, durable, heat-conducting film for lasting, reliable dissipation of heat from the LED board
- Low heat generation thanks to the latest LED technology
- Pressure compensation element for extreme temperature fluctuations
- Full luminous flux is available instantly after switching on
- Low energy consumption with high light output
- Maintenance-free
- Wide operating temperature range (up to 60°C)
- No UV/IR-radiation
- Vibration-resistant
- Accessories available from stock
- Various directional characteristics available

**LED Floodlight
AlphaLUXX**

AlphaLUXX General

- ✓ Made in Germany
- ✓ Revolutionary PTFE surface coating
- ✓ Optional in vibration-damped design
- ✓ Approved for fire endangered premises
(D-Label)
- ✓ Suitable for food industry (according to IFS)

The AlphaLUXX floodlight is 100% **Made in Germany**. During the development, great emphasis was placed on the quality of the components, coupled with excellent efficiency and state-of-the-art technology.

Short response times at the **Neuss production plant** are guaranteed, meaning we are able to meet customer requirements promptly in terms of different outputs and front panels, various cable lengths and special color designs.

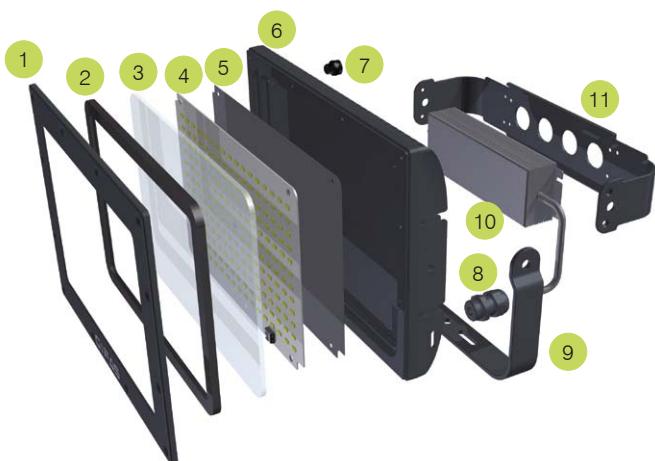

AlphaLUXX 80-120

The Lamp impresses with the enormous efficiency and is also available in a dimmable version.

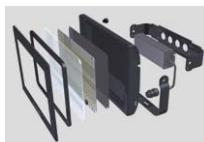

AlphaLUXX 25-60

The AlphaLUXX 25-60 is the practical version for mobile use and convinces with its quality, performance and handling.

AlphaLUXX - Construction / Features

- 1 Die-cast aluminium frame
- 2 U-profile silicon seal
- 3 Front panel (toughened glass or PC)
- 4 LED board
- 5 Heat conducting film
- 6 Die-cast aluminium housing
- 7 Pressure compensation element
- 8 Cable gland
- 9 Mounting bracket
- 10 Power supply
- 11 Power supply bracket

GIFAS Approach

This development is based on the need to manufacture a floodlight which merits the **MADE IN GERMANY** mark of excellence, in terms of performance and quality. With the AlphaLUXX, GIFAS has succeeded in developing a competitive LED floodlight that satisfies the highest demands and can also be used in challenging industrial sectors (for example, the food industry).

Surface coating

Industrial lights often have problems with dirt gathering on the surface and the associated reduction in cooling capability. The **PTFE surface coating (coll. Teflon®)** on the AlphaLUXX has a very low friction coefficient. Dust and dirt literally "bead" off the light. Even harsh acids cannot attack a PTFE coating. Improved thermal conductivity results from the four-times thinner PTFE coating, in comparison with powder coating.

Thermal management

Efficient cooling is crucial to the longevity of the LEDs and ultimately affects the whole lighting system. In order to achieve this on a long-term basis for the AlphaLUXX, several technical components have been used for optimum thermal management. These include a heat sink (housing with cooling fins) made of highly thermo-conductive die-cast aluminium, a PTFE surface with a very thin coating and heat conducting film for optimum connection of the contact areas. We can therefore ensure an **operating temperature range of up to 60° C.**

Quality

The components are selected according to the highest quality standards. High-alloy, corrosion-resistant aluminium housing (230D), stainless steel installation material (V4A), LEDs and electronics from reputable manufacturers (Seoul Semiconductor and Meanwell). Individual testing of every light in accordance with DIN EN 60598-1, certified according to ENEC. The specific coordination of the technical components attains a **service life of 80,000 hours**.

Technology

At up to **149 lumens per watt**, the tremendous **efficiency** of the AlphaLUXX is currently unique in the market. Also available as a dimmable version.

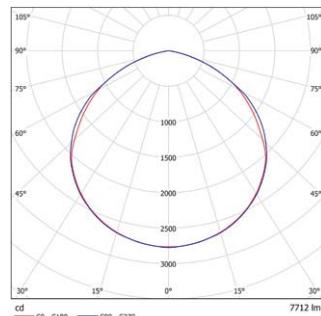

LED

The AlphaLUXX uses exclusively **high-end SMD LEDs** from reputable manufacturers, which are ideal in terms of light quality, lifespan, light color and efficiency. The neutral, white 5000K light and the good color rendering index of over Ra 80, match the maximum human vision in daylight and as a result the best resolution of detail.

AlphaLUXX 25-60

Light intensity distribution at 120°

Product features

- Enormous efficiency of up to 149 lumens per watt
- Robust housing made of corrosion-resistant die-cast aluminium (alloy: 230D)
- Dirt-resistant PTFE surface coating, approved for the food industry

AlphaLUXX 80-120 Ball-proof

Ball-proof according to
DIN VDE 0710-13

AlphaLUXX 80-120 Ball-proof

With the AlphaLUXX ball impact resistant GIFAS offers a robust, safe solution for the lighting of sports facilities.

The AlphaLUXX 80-120 reliably withstands the specific conditions that can affect luminaires in sports hall under ball bombardment, such as handball, indoor football or volleyball, and ensures permanently safe lighting. The stable fixation of the retaining bracket ensures that the spotlight remains reliably in the attached position.

Product features

- Ball-proof design for sports halls according to DIN VDE 0710-13
- Robust housing made of corrosion-resistant die-cast aluminium
- Dirt-repellent PTFE surface coating
- Impact resistant plastic screen (PC)
- Custom-made circumferential U-profile seal
- Low heat generation thanks to state-of-the-art LED technology
- Pressure compensation element for extreme temperature fluctuations
- Full luminous flux immediately after switching on
- Low energy consumption with high luminous efficiency
- Maintenance-free
- Large temperature range (up to 60 °C)
- No UV/IR radiation
- Vibration-resistant

Temperature range for operation	optional DALI interface
	80W -30°C to +60°C
	100W -30°C to +55°C
	120W -30°C to +50°C
Max. surface temperature	+90°C (suitable for use in industrial premises with fire hazards), D rating label
Housing material	Die-cast aluminium, alloy 230D
Housing surface	PTFE-coated
Housing color	black
Cover	(optional other colors also available)
Weight	5 mm PC clear, optional satinized
Dimensions (LxBxH)	approx. 7,0 kg
Certification	389 x 252 x 106,5 mm
	DIN VDE 0710-13, ENEC, CE, IK10

EDP No.	Product-ID-No.	Description
800203	ALPHALUXX.80W.230VAC. PC.KLAR.BALLWURFSICHER	AlphaLUXX Ball-proof, 80W, 5.000K, 12.800lm, PC clear, 230V
800202	ALPHALUXX.100W.230VAC. PC.KLAR.BALLWURFSICHER	AlphaLUXX Ball-proof, 100W, 5.000K, 16.500lm, PC clear, 230V
800201	ALPHALUXX.120W.230VAC. PC.KLAR.BALLWURFSICHER	AlphaLUXX Ball-proof, 120W, 5.000K, 18.636lm, PC clear, 230V

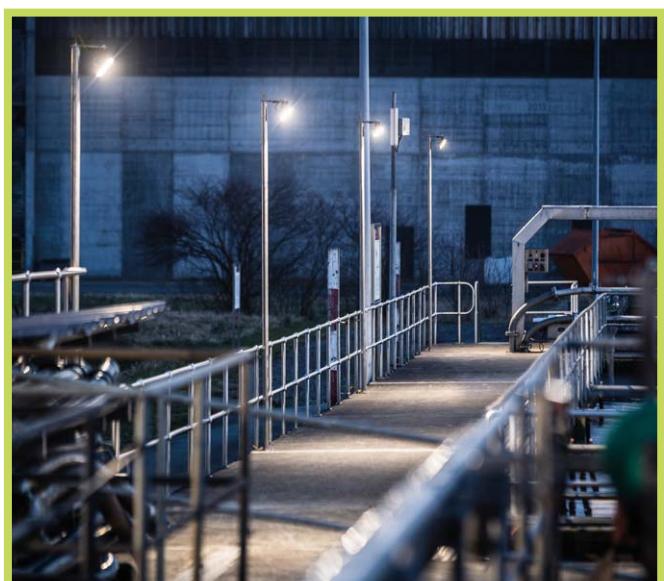

LED Floodlight - AlphaLUXX

AlphaLUXX - lighting of warehouses / storage areas

AlphaLUXX - Facade lighting

AlphaLUXX - Lighting of a wastewater treatment plant

AlphaLUXX - Lighting in the power plant

AlphaLUXX - Tunnel lighting

A black metal tripod stand holds a white rectangular LED floodlight fixture. The fixture is mounted on a horizontal pole against a clear blue sky. The stand has three legs and red circular weights at the base. A red ladder is visible in the background.

LED Floodlight
PLAZA FlatLED

PLAZA FlatLED - General / Features

Compact Floodlight – PLAZA FlatLED

Slim design, single - LED technology and the latest, highly efficient driver technology were joined for a new LED light - the PLAZA FlatLED of GIFAS-ELECTRIC. In addition to ease of maintenance, high energy efficiency and high reliability, the PLAZA FlatLED is characterized by its simple design. Available in different capacities and various optics, uniform and planar hall lighting, a wide range of outdoor areas, or to use for lighting a highbay warehouse - all lighting requirements can be solved.

Compact design

By using the latest advanced technology an extremely thin design and a modern and simple appearance can be achieved.

Light Distribution

The light distribution of the PLAZA FlatLED has been designed to achieve uniformity and a homogeneous illumination situation even over large areas. Through the prism glass used not only the light is optimally protected, the glare is reduced.

Single-LED technology

In order to increase the light output and reliability of the lamp, it has many individual LEDs.

Type of protection

To withstand all odds, it was designed for a protection of IP65 / IP66. So you can always be sure that the light meets all your needs.

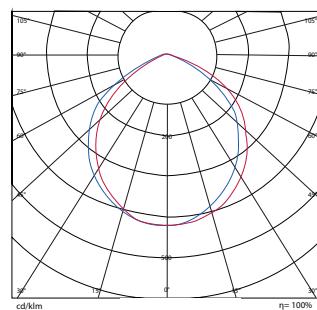

Fixture

Through the flexible fixture, the lamp can be adjusted to achieve the best illumination.

PLAZA FlatLED FLOOD 16W

Light intensity distribution at 120°

Product features

Flat surface floodlight with symmetrical light characteristic. PLAZA FlatLED FLOOD 16W has a slim design, is powder-coated color black, with 5 m supply line H05RN-F and IP44 safety plug.

- Full luminous flux is available immediately
- Lower power consumption with good luminous efficiency
- Minimal temperature development
- Extremely resistant to switching (>1 million)
- Maintenance-free
- Operates within a broad temperature range -20°C to +50°C
- No UV/IR-radiation
- Not sensitive to impact and vibrations

Use: Indoor and Outdoor

Billboards, driveways, facades and object lighting, civil protection, schools, public building ...

Appropriate for all locations where a broad area of illumination is required.

Included in the box

- Fixing bracket for ceiling- wall- or floor-mounting

Optional accessories available (see page 30).

PLAZA FlatLED FLOOD 24W

Light intensity distribution at 120°

Product features

Flat surface floodlight with symmetrical light characteristic. Plaza FlatLED FLOOD 24W has a slim design, is powder-coated color black, with 5 m supply line H07RN-F and IP44 safety plug.

- Full luminous flux is available immediately
- Lower power consumption with good luminous efficiency
- Minimal temperature development
- Extremely resistant to switching (>1 million)
- Maintenance-free
- Operates within a broad temperature range -20°C to +50°C
- No UV/IR-radiation
- Not sensitive to impact and vibrations

Use: Indoor and Outdoor

Billboards, driveways, facades and object lighting, civil protection, schools, public building ...

Appropriate for all locations where a broad area of illumination is required.

Included in the box

- Fixing bracket for ceiling- wall- or floor-mounting

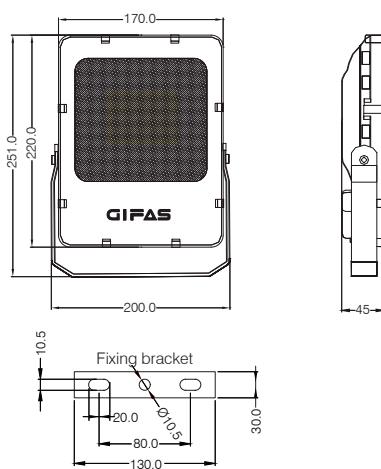

Optional accessories available (see page 30).

Technical data

Operating Voltage	230VAC / 220VDC
LED Power	24W
Illuminant	SMD-LEDs
System Efficiency	142lm/W
Luminous flux	3.400lm
CRI Index	Ra>80
L80/B50	>85.000 Std.
Loss of luminous flux	<10%
LED resistance to switching	>1 mio
Color temperature	5.700K
MacAdam	3-step
Temperature range for operation	-20°C to +50°C
Max. surface temperature	+90°C (suitable for use in industrial premises with fire hazards), D rating label
